2. Region 10 Supplement to FSM 2720, Special Uses; Management of Strictly Point-To-Point Commercial Transportation Under Special Use Authorization to National Forest System Lands within the Visitor Center Subunit of Mendenhall Glacier Recreation Area. The Alaska Region final directive supplement addresses challenges in managing strictly point-to-point commercial transportation to and from the Mendenhall Glacier Visitor Center (Visitor Center) during the cruise ship season (April – October). Visitation to the Visitor Center has increased to nearly 700,000 annual visitors as of 2018, with additional growth expected over the next several years. Existing facilities cannot accommodate the growing number of visitors. Increased use has affected resources and visitor safety and experiences. The final directive supplement allows the Alaska Region of the Forest Service to restrict strictly point-to-point commercial transportation to and from the Visitor Center during the cruise season. The final directive supplement will enhance the Alaska Region’s management and enforcement of authorized point-to-point commercial transportation to and from the Visitor Center. The 60-day comment period for this directive began June 24, 2021, and closed August 28, 2021. Five comments were

received, which can be viewed at

<https://cara.fs2c.usda.gov/Public/ReadingRoom?project=ORMS-2314>. The final

directive was issued January 13, 2022, and can be viewed at

3. FSM 2700, Special Uses Management, Chapter 40, Vegetation Management Pilot Projects, and FSH 2709.11, Special Uses Handbook, Chapter 50, Standard Forms and Supplemental Clauses. The Forest Service has issued this final directive, which implements section 8630 of the Agriculture Improvement Act of 2018 (Farm Bill). The Farm Bill created a voluntary pilot project program for removal of vegetation other than hazard trees near powerline rights-of-way on National Forest System (NFS) lands. The final directive establishes Agency procedures to enhance the reliability of the electric grid and reduce the threat of wildfire due to vegetation-related conditions adjacent to powerline facility rights-of-way. Approved vegetation management pilot projects will allow electric utilities to conduct voluntary vegetation management, other than removal of hazard trees, up to 150 feet from either side of a powerline facility right-of-way and for a total width of up to 200 feet. The 30-day comment period for this directive began December 10, 2020, and closed January 11, 2021. Four comments were received, which can be viewed at <https://cara.ecosystem-management.org/Public/ReadingRoom?project=ORMS-2717>. The final directive was issued February 10, 2022, and can be viewed at https://www.fs.fed.us/im/directives/fsm/2700/wo_2740-Amend%202022-1.docx.
4. FSH 2709.11, Special Uses Handbook, Chapter 80, Operating Plans and Agreements for Powerline Facilities. The Forest Service has issued this final directive, which implements section 512 of the Federal Land Policy and Management Act (FLPMA), as added by the Consolidated Appropriations Act of 2018. The final directive will help reduce threats of wildfire and enhance electric system reliability by establishing Agency procedures for

development, review, and approval of proposed operating plans and agreements for vegetation management, inspection, and operation and maintenance of powerline facilities on NFS lands. The 30-day comment period for this directive began December 10, 2020, and closed January 11, 2021. Fourteen comments were received, which can be viewed at <https://cara.ecosystem-management.org/Public/ReadingRoom?project=ORMS-2718>. The final directive was issued February 10, 2022, and can be viewed at https://www.fs.fed.us/im/directives/fsh/2709.11/wo_2709.11_80-Amend%202022-1.docx.
